Chapter 1 - WHY Demand Forecasting is So Important to Supply Chain Professionals and Managers

<i>Inside the Crystal Ball</i>	Error!
<i>Bookmark not defined.</i>	
Determinants of Demand	Error! Bookmark not defined.
Demand Forecasting Defined	Error! Bookmark not defined.
Why Demand Forecasting?	Error! Bookmark not defined.
The Role of Demand Forecasting in a Consumer Data-Driven Supply Chain	4
Is Demand Forecasting Worthwhile?	7
Who Are the End Users of Demand Forecasts in the Supply Chain?	8
Learning from Industry Examples	9
Examples of Product Demand	10
The Demand Planner’s Dilemma: Is a Forecast Just a Number or Something More?	13
<i>Creating a Structured Forecasting Process</i>	14
<i>The PEER Methodology: A Structured Demand Forecasting Process</i>	15
<i>Case Example: A Consumer Electronics Company</i>	16
PEER Step 1: Identifying Factors Likely to Affect Changes in Demand	17
The GLOBL Product Lines	18
The Marketplace for GLOBL Products	18
PEER Step 2: Execute to Select a Forecasting Technique	20
PEER Step 3: Evaluate Forecasting Models	23
PEER Step 4: Reconcile Final Forecasts	23
<i>Getting Insights into Forecasting New Demand for Products and Services</i>	23
<i>Takeaways</i>	27

Chapter 2 -Smarter Forecasting Is Mostly about Data:

Improving Data Quality through Data Exploration and Visualization	29
<i>Smarter Forecasting Is Mostly about Data</i>	30
Exploring Data Patterns	30
Learning by Looking at Data Patterns	31
<i>Judging the Quality of Data</i>	31
<i>Data Visualization</i>	35
Time Plots	36
Scatter Diagrams	37
<i>Displaying Data Distributions</i>	39
Overall Behavior of the Data	39
Stem-and-Leaf Displays	40
Box Plots	42
Quantile-Quantile Plots	43
<i>Creating Data Summaries (Resistant and Robust!)</i>	44
Centrality	45
Resistant Centrality: The Trimmed Mean	45
Resistant Variability: Median Absolute Deviation from the Median	46
Resistant Variability: The Interquartile Range	47
Detecting Outliers with Resistant Measures	48
<i>The Need for Nonconventional Methods</i>	49
M-Estimators	50
A Numerical Example	50
<i>Why Is the Normal Distribution So Important?</i>	53
<i>Case Example: GLOBL Product Line B Sales in Region A</i>	54
<i>Takeaways</i>	56

Chapter 3 - Predictive Analytics: Selecting Useful Forecasting Techniques

.....	57
<i>All Models Are Wrong. Some Are Useful</i>	58
Qualitative Techniques	58
Quantitative Approaches	61
Self-Driven Forecasting Techniques	62
Combining Forecasts is a Useful Method	63
Informed Judgment and Modeling Expertise	64
A Multimethod Approach to Forecasting	65
<i>Some Supplementary Approaches</i>	66
Market Research	66
New Product Introductions	66
Promotions and Special Events	67
Sales Force Composites and Customer Collaboration	67
Neural Nets for Forecasting	68
<i>A Product Life-Cycle Perspective</i>	68
<i>A Prototypical Forecasting Technique: Smoothing Historical Patterns</i>	70
Smoothing with Moving Averages	71
Why Moving Average Forecasting Needs to be Swept into the Dustbin	74

A Final Note:Uncertainty is a Certain Factor	77
Weighting Based on the Most Current History	77
<i>A Spreadsheet Example: How to Forecast with Weighted Averages</i>	79
Choosing the Smoothing Weight	81
Forecasting with Limited Data	81
Evaluating Forecasting Performance	819
<i>Takeaways.....</i>	82

Chapter 4 - Taming Uncertainty: What You Need to Know about Measuring Forecast Accuracy

<i>The Need to Measure Forecast Accuracy</i>	84
Analyzing Forecast Errors.....	85
Lack of Bias	85
What Is an Acceptable Precision?.....	86
<i>Ways to Evaluate Accuracy</i>	89
The Fit Period versus the Holdout Period	89
Goodness of Fit versus Forecast Accuracy	90
Item Level versus Aggregate Performance	90
Absolute Errors versus Squared Errors	91
Measures of bias	91
Measures of Precision	93
Comparing with Naive Techniques	96
Relative Error Measures.....	97
<i>The Myth of the MAPE . . . and How to Avoid It</i>	98
Are There More Reliable Measures Than the MAPE?	99
<i>Predictive Visualization Techniques.....</i>	99
Ladder Charts	99
Prediction-Realization Diagram	100
<i>Empirical Prediction Intervals for Time Series Models</i>	103
Prediction Interval as a Percentage Miss.....	104
Prediction Intervals as Early Warning Signals	104
Trigg Tracking Signal.....	106
<i>Spreadsheet Example: How to Monitor Forecasts</i>	107
Quick and Dirty Control.....	107
The Tracking Signal in Action	108
Adapting the Tracking Signal to Other Spreadsheets.....	109
<i>Mini Case: Accuracy Measurements of Transportation Forecasts</i>	110
<i>Takeaways.....</i>	115

Chapter 5 - Characterizing Demand Variability: Seasonality, Trend, and the Uncertainty Factor.....

<i>How Business-Cycle Data Analysis Can Lead to More Insightful Forecasts of Upcoming Economic Downturns</i>	118
Trends and Cycles.....	119
Seasonality	121
Irregular or Random Fluctuations.....	125
Weekly Patterns	128
Trading-Day Patterns	128

<i>Exploring Components of Variation</i>	129
Contribution of Trend and Seasonal Effects	130
Interpreting the Residual Table	131
A Diagnostic Plot and Test for Additivity	132
The Median Polish	134
<i>Unusual Values Need Not Look Big or Be Far Out</i>	135
<i>The Ratio-to-Moving-Average Method</i>	137
Step 1: Trading-Day Adjustment	137
Step 2: Calculating a Centered Moving Average	138
Step 3: Trend-cycle and Seasonal Irregular Ratios	139
Step 4: Seasonally Adjusted Data	139
<i>GLOBL Case Example: Is the Decomposition Additive or Not?</i>	140
<i>APPENDIX: A Two-Way ANOVA Table Analysis</i>	142
Percent Contribution of Trend and Seasonal Effects	143
<i>Takeaways</i>	144
Chapter 6 - Dealing with Seasonal Fluctuations	145
 <i>Seasonal Influences</i>	146
Removing Seasonality by Differencing	147
Seasonal Decomposition	148
Uses of Seasonal Adjustment	150
<i>Multiplicative and Additive Seasonal Decompositions</i>	151
Decomposition of Monthly Data	151
Decomposition of Quarterly Data	154
Seasonal Decomposition of Weekly Point-of-Sale Data	157
<i>Census Seasonal Adjustment Method</i>	160
The Evolution of the X-13ARIMA-SEATS Program	160
Why Use the X-13ARIMA-SEATS Seasonal Adjustment Program?	161
A Forecast Using X-13ARIMA-SEATS	162
<i>Resistant Smoothing</i>	162
<i>Mini Case: A PEER Demand Forecasting Process for Turkey Dinner Cost</i>	167
<i>Takeaways</i>	173
Chapter 7 - Trend-Cycle Forecasting with Turning Points	175
 <i>Demand Forecasting with Economic Indicators</i>	176
Origin of Leading Indicators	176
Use of Leading Indicators	179
Composite Indicators	181
Reverse Trend Adjustment of the Leading Indicators	181
Sources of Indicators	183
Selecting Indicators	183
<i>Characterizing Trending Data Patterns</i>	185
Autocorrelation Analysis	185
First Order utocorrelation	186
The Correlogram	189
Trend-Variance Analysis	192
<i>Using Pressures to Analyze Business Cycles</i>	194

<i>Mini Case: Business Cycle Impact on New Orders for Metalworking Machinery</i>	197
1/12 Pressures.....	197
3/12 Pressures.....	199
12/12 Pressures.....	199
<i>Turning Point Forecasting</i>	200
Ten-Step Procedure for a Turning-Point Forecast	200
Alternative Approaches to Turning-Point Forecasting	201
<i>Takeaways</i>	201

Chapter 8 - Big Data: Baseline Forecasting With Exponential Smoothing Models.....**201**

<i>What is Exponential Smoothing?</i>	204
Smoothing Weights.....	205
The Simple Exponential Smoothing Method.....	207
<i>Forecast Profiles for Exponential Smoothing Methods</i>	209
Smoothing Levels and Constant Change.....	210
Damped and Exponential Trends.....	214
Some Spreadsheet Examples	217
Trend-Seasonal Models with Prediction Limits.....	222
The Pegels Classification for Trend-Seasonal Models.....	226
Outlier Adjustment with Prediction Limits.....	226
Predictive Visualization of Change and Chance – Hotel/motel room demand	228
<i>Takeaways</i>	231

Chapter 9 - Short-Term Forecasting with ARIMA Models**233**

<i>Why Use ARIMA Models for Forecasting?</i>	234
The Linear Filter Model as a Black Box.....	235
<i>A Model-Building Strategy</i>	237
Identification: Interpreting Autocorrelation and Partial Autocorrelation Functions	237
Autocorrelation and Partial Autocorrelation Functions.....	238
An Important Duality Property	240
Seasonal ARMA Process.....	242
<i>Identifying Nonseasonal ARIMA Models</i>	243
Identification Steps	244
Models for Forecasting Stationary Time Series.....	244
White Noise and the Autoregressive Moving Average Model.....	245
One-Period Ahead Forecasts.....	247
L-Step-Ahead Forecasts.....	247
Three Kinds of Short-Term Trend Models	248
A Comparison of an ARIMA (0, 1, 0) Model and a Straight-Line Model.....	249
<i>Seasonal ARIMA Models</i>	252
A Multiplicative Seasonal ARIMA Model.....	252
Identifying Seasonal ARIMA Models	254
<i>Diagnostic Checking: Validating Model Adequacy</i>	255
<i>Implementing a Trend/Seasonal ARIMA Model for Tourism Demand</i>	256
Preliminary Data Analysis	257
Step 1: Identification.....	257
Step 2: Estimation	258

Step 3: Diagnostic Checking	259
ARIMA Modeling Checklist	262
Takeaways	263
Postscript	263

Chapter 10 - Demand Forecasting with Regression Models 265

What Are Regression Models?	266
The Regression Curve	267
A Simple Linear Model	267
The Least-Squares Assumption	268
CASE: Sales and Advertising of a Weight Control Product	269
Creating Multiple Linear Regression Models	270
Some Examples	271
CASE: Linear Regression with Two Explanatory Variables	273
Assessing Model Adequacy	275
Transformations and Data Visualization	275
Achieving Linearity	276
Some Perils in Regression Modeling	277
Indicators for Qualitative Variables	281
Use of Indicator Variables	281
Qualitative Factors	281
Dummy Variables for Different Slopes and Intercepts	282
Measuring Discontinuities	283
Adjusting for Seasonal Effects	283
Eliminating the Effects of Outliers	284
How to Forecast with Qualitative Variables	285
Modeling with a Single Qualitative Variable	285
Modeling with Two Qualitative Variables	285
Modeling with Three Qualitative Variables	285
A Multiple Linear Regression Checklist	289
Takeaways	290

Chapter 11 - Gaining Credibility Through Root-Cause Analysis and Exception Handling 291

The Diagnostic Checking Process in Forecasting	292
The Role of Correlation Analysis in Regression Modeling	292
Linear Association and Correlation	293
The Scatter Plot Matrix	294
The Need for Outlier Resistance in Correlation Analysis	295
Using Elasticities	296
Price Elasticity and Revenue Demand Forecasting	298
Cross-Elasticity	299
Other Demand Elasticities	230
Estimating Elasticities	230
Validating Modeling Assumptions: A Root-Cause Analysis	302
A Run Test for Randomness	304

Nonrandom Patterns	305
Graphical Aids	307
Identifying Unusual Patterns	308
<i>Exception Handling: The Need for Robustness in Regression Modeling</i>	308
Why Robust Regression?	309
M-Estimators	309
Calculating M-Estimates	310
<i>Using Rolling Forecast Simulations</i>	312
Choosing the Holdout Period	312
Rolling Origins	313
Measuring Forecast Errors over Lead Time	313
<i>Mini Case: Estimating Elasticities and Promotion Effects</i>	314
A Four-Step Procedure	316
Taming Uncertainty	318
<i>Takeaways</i>	321

Chapter 12 - The Final Forecast Numbers: Reconciling Change & Chance

<i>Establishing Credibility</i>	324
Setting Down Basic Facts: Forecast Data Analysis and Review	324
Establishing Factors Affecting Future Demand	325
Determining Causes of Change and Chance	325
Preparing Forecast Scenarios	325
<i>Analyzing Forecast Errors</i>	326
Taming Uncertainty: A Critical Role for Informed Judgment	326
Forecast Adjustments: Reconciling Sales Force and Management Overrides	328
Combining Forecasts and Methods	329
Verifying Reasonableness	330
Selecting 'Final Forecast' Numbers	331
<i>Gaining Acceptance from Management</i>	332
The Forecast Package	332
Forecast Presentations	333
<i>A Demand Forecaster's Checklist</i>	334
<i>Case: Creating a Final Forecast for the GLOBL Company</i>	335
Step 1: Developing Factors	328
Impact Change Matrix for the Factors Influencing Product Demand	329
The Impact Association Matrix <small>Error! Bookmark not defined.</small> for the Chosen Factors	330
Exploratory Data Analysis of the Product Line and Factors Influencing Demand	331
Step 2: Creating Univariate and Multivariable Models for Product Lines	333
Handling Exceptions and Forecast Error Analysis	334
Combining Forecasts from Most Useful Models	336
An Unconstrained Baseline Forecast for GLOBL Product Line B, Region A	337
Step 3: Evaluating Model Performance Summaries	340
Step 4: Reconciling Model Projections with Informed Judgment	341
<i>Takeaways</i>	350

Chapter 13 - Creating a Data Framework for Agile Forecasting and Demand Management

351

<i>Why Demand Managers Need to Manage a Demand Forecasting Process That Is Independent of Plans and Targets</i>	352
Data-Driven Demand Management Initiatives	354
Demand Information Flows	354
<i>Creating Planning Hierarchies for Demand Forecasting</i>	356
What Are Planning Hierarchies?	356
Operating Lead Times	358
Distribution Resource Planning (DRP)—A Time-Phased Planned Order Forecast	358
Spreadsheet Example: How to Create a Time-Phased Replenishment Plan	360
<i>A Framework for Agility in Forecast Decision Support Functions</i>	361
The Need for Agile Demand Forecasting	361
Dimensions of Demand	361
A Database-Driven Forecast Decision Support Architecture	363
Dealing with Cross-Functional Forecast Data Requirements	365
Specifying Customer/Location Segments and Product Hierarchies	366
<i>Automated Statistical Models for Baseline Demand Forecasting</i>	367
Automated Model Selection	369
Selecting Useful Models Visually	370
Searching for Optimal Smoothing Procedures	375
Error-Minimization Criteria	376
Searching for Optimal Smoothing Weights	376
Starting Values	376
Computational Support for Management Overrides	379
<i>Takeaways</i>	380

Chapter 14 - Blending Agile Forecasting with an Integrated Business Planning Process

PEERing into the Future: Creating a Framework for Agile Forecasting in Demand Management

The Elephant and the Rider Metaphor	383
Forecasting Does Not Need to Be the Enemy of Agility	385
<i>Creating an Agile Forecasting Implementation Checklist</i>	393
Selecting Overall Goals	393
Obtaining Adequate Resources	394
Defining Data	395
Forecast Data Management	395
Selecting Forecasting Software	396
Forecaster Training	396
Coordinating Modeling Efforts	396
Documenting for Future Reference	396
Presenting Models to Management	396
<i>Engaging Agile Forecasting Decision Support</i>	397
Economic/Demographic Data and Forecasting Services	397
Data and Database Management	398
Modeling Assistance	398
Training Workshops	398
<i>The Forecast Manager's Checklists</i>	399
Forecast Implementation Checklist	399
Software Selection Checklist	400

Automated Demand Forecasting Checklist	401
<i>Takeaways</i>	402
